

Russound and HAI Integration

CAV6.6 or CAM6.6 Connectivity with OmniPro II

Russound's CAV6.6 and CAM6.6 multiroom controller amplifier works in conjunction with HAI's OmniTouch™ Touchscreen. When combined, they work together to make it possible to have entertainment, home security and home automation in one system.

The OmniTouch controls the volume levels and source selection for each audio zone. In addition, HAI's "OmniPro II modes" enable party, night and away modes for automatic control of speakers, lighting and temperatures.

Russound's Audio Distribution Systems combined with HAI's home control systems coordinate to provide entertainment and control for the ultimate in enjoyment and convenience.

HAI OmniTouch Touchscreen

System Requirements

Russound CAV6.6 or CAM6.6
HAI OmniPro II (2.9c or later)
36A05-4 Serial Connectivity Kit
One or more OmniTouch Touchscreens

The requirements for OmniPro II and OmniTouch Touchscreen support:

- HAI OmniPro II automation controller running 2.9c or higher firmware. If the OmniPro II automation controller is running a lower version of firmware, an upgrade chip (available in the HAI Online Store on the dealer support website) is required.
- HAI OmniTouch Touchscreen running Screens Version 5 or higher. To determine the OmniTouch version running, perform the following steps:

1. On the OmniTouch touchscreen, press the Setup icon followed by the Screen Setup icon. Then press the Next button.
2. If the bottom left-hand portion of the screen is blank or shows a "Screens Version" that is less than 5, then updated firmware and screens must be loaded into the touchscreen.

To upgrade the OmniTouch touchscreen purchase an HAI OmniTouch Loader Kit (HAI Part Number 32A09-1). This kit consists of a programming cable and software utility designed to allow dealers and installers to load new firmware and screens into an OmniTouch touchscreen. This kit is available in the HAI Online Store on the dealer support website and is necessary for upgrades.

The firmware version for the CAV or CAM must be 2.00.01 or higher for proper integration with HAI products. For more information on HAI's product line, please visit www.homeauto.com.

Since 1967, innovation, quality and reliability have been the core of the Russound product tradition. Today, Russound offers everything for enjoying multiroom audio-video in your home. All audio-video distributed solutions are built to high standards and designed with the unique consideration of making products that are easy to enjoy and a pleasure to live with.

HAI is a privately held manufacturer of integrated automation and security products for residential and commercial use.
