A-BUS PATENT ACCEPTED IN EUROPE

News Strengthens A-BUS Position as Global Cat-5 Audio Solution

Rosebery, NSW Australia **March 14, 2006**-- LeisureTech Electronics, inventors of A-BUS the popular multi-room audio technology, announced that they have received official notification from the European Patent Office that their application for a patent for A-BUS has been accepted. This means that the patent on A-BUS should be granted sometime in mid to late 2006. LeisureTech already holds patents for A-BUS in Australia and New Zealand along with an allowance on its U.S. patent.

Andrew Goldfinch, founder of LeisureTech and co-inventor of A-BUS technology, commented, "This is very welcome news indeed and it certainly reaffirms our belief that A-BUS is a truly compelling idea. For more than five years, LeisureTech and our partners have successfully marketed the many benefits of A-BUS technology worldwide. Gaining the patent in Europe will further strengthen the A-BUS platform as the standard for affordable multi-room audio."

A-BUS is a unique, proven technology for multi-room audio that utilizes a single Category 5 cable to carry signal, data, IR, status and power. This ingenious approach places the amplifiers closer to the speakers, enabling superior sound quality, increased flexibility, simpler installation, consumer-friendly operation and greater affordability. A-BUS is currently licensed to more than fifteen leading manufacturers with various and diverse product offerings in the multi-room audio category. One of the key benefits of A-BUS is that it is virtually plug and play so that any A-BUS product will work with another, regardless of brand.

A-BUS technology, successfully utilized since 1998 and then launched worldwide in 2000, is becoming the standard for affordable multi-room audio. A-BUS is also the recipient of numerous industry awards and media acclaim for innovation and excellence.

About LeisureTech Electronics

Founded in 1977, LeisureTech Electronics' is now a global OEM technology provider and manufacturer for the residential systems market. LTE founder Andrew Goldfinch teamed up with Len Andrews in 1991 and in 1997 the duo invented

A-BUS, a revolutionary technology for multi-room audio. A-BUS, launched worldwide in 2000, is licensed to leading CE manufacturers and becoming the standard for affordable multi-room audio applications. In 2005, LeisureTech opened its own design and manufacturing facility in Thailand to support its rapid growth while providing expanded resources for its customers.
