

DATA SHEET

Cool-stack I

General Description

A one rack-unit high cooler suitable for moderate heat loads. Available in exhaust or intake versions; both include a 90° thermal switch, or can accept a 12 volt trigger signal. Exhausts heated air or takes fresh air in through front panel. Extremely quiet.

Features

- ✍ 1 RU high
- ✍ Thermal switch included; can also take 12 volt trigger signal
- ✍ Extremely low noise
- ✍ 1 year parts and labor warranty

Use an exhaust Cool-stack I at the top of a rack and vent panels below heat-generating components to exhaust heated air from moderate heat loads. For larger heat loads, add an intake version at the bottom of the rack to bring fresh air in.

Specifications

Parameter	Value	Units
Air Flow	40	CFM
Noise level	21	dBA
Dimensions	1.75H x 19W x 8D	Inches
	4.5H x 48.3W x 20.3D	cm
Power consumption	7	Watts
Weight	8/3.7	Lbs/kg
Part number	00-301-02	Exhaust version
	00-302-01	Intake version
