**ACTIVE THERMAL MANAGEMENT SIGNS LEISURETECH ELECTRONICS FOR
AUSTRALIAN AND NEW ZEALAND DISTRIBUTION**

*Companies Partner in Product Sales and Installation Efforts
For Electronics' Cooling Products*

Valencia, CA – January 28, 2008 – Active Thermal Management (ATM), experts in quiet thermal protection solutions, today announced it has signed LeisureTech Electronics (LTE), headquartered in Australia, to act as its exclusive distributor for the Australian and New Zealand markets. The new distributor will carry ATM's full line of component cooling products designed for use in specialized residential electronic equipment installations. The protective and performance-enhancing cooling and ventilating solutions from ATM number more than 20 separate devices, and LTE will manage the complete collection for delivery to its own custom installer and distributor clientele.

“The issues surrounding cooling and ventilating home electronic systems are becoming more dynamic as the size and creativity of the applications grow,” said Frank Federman, ATM's CEO. “Our integration specialist partners, such as LTE, enable efficient and safe performance of the systems they, and their customers, install.”

ATM offers answers to heat-generated issues including reduction, transfer, ventilation, and others. LTE will handle the new dual-country distribution of these solutions to its audio video retailers and custom installers.

“We have been providing the Australian and New Zealand market with custom audio equipment, accessories, and audio video expertise for more than 30 years,” said Phillip Maljevac, National Sales Manager for LTE. “It is through this type of partnership with ATM that we remain the most well equipped and knowledgeable source for today's growing home electronics installation solutions in our market.”

About LeisureTech Electronics

Founded in 1977, LeisureTech Electronics is a global OEM technology provider and manufacturer for the residential systems market. LTE founder Andrew Goldfinch teamed up with Len Andrews in 1989 and in 1997 the enterprising duo invented A-BUS, a revolutionary technology for multi-room audio. A-BUS, launched worldwide in 2000, is licensed to leading CE manufacturers and quickly becoming the standard for affordable multi-room audio applications. In 2005, LeisureTech opened its own design and manufacturing facility in Thailand to support its rapid growth while providing expanded resources for its customers.
