

Discover Great Sound

BLU Series

There once was a time when great home theater experiences were reserved for the elite. Speakers capable of filling the room with high-end sound, creating the effect of actually being in the middle of the action, were not practical for every budget. But with the introduction of the BLU Series, TruAudio has proven once and for all that great home theater experiences don't have to cost a fortune. You too can have a home theater to brag about, without breaking your bank!

The BLU Series was meticulously designed to provide the sound of a high-end, expensive speaker at a fraction of the cost. Its three-way design with side-firing woofer offers detailed, but not too heavy, audio. Its crossover was simplified, weeding out unnecessary components to produce cleaner, more accurate sound. Driver materials, cabinet size, cabinet design – each element was specifically chosen to create a speaker that lives up to TruAudio's highest standards.

TruAudio's BLU Series is being praised as the most versatile and affordable floor standing loudspeakers on the market. From a small bookshelf music system to a rumbling home theater - surround yourself in sound that will make your friends BLU with envy.
