features & specs

- All-weather, outdoor speaker systems
- Available with either an iCast transmitter for iPod use or UAT a USB device to stream iTunes from your computer
- Allows connection of other audio devices – MP3 players and computers – using the auxiliary input/output jack
- Transmits signals up to 100m outdoors
- Features buttons for pause/play and track forward/track back for remote iPod operation
- Can run two speakers off one transmitter
- One downward firing woofer
- Four 3" high frequency drivers in an omnidirectional array
- Made of water resistant, UV coated plastic
- Great for apartment living
- Can link in with Multi-room Audio systems and remote controllable via iPhone or iTunes
- Transmitters search for open channels in the 2.4GHz band, and instantaneously jump to them – ultimately avoiding interference and allowing for unprecedented sound quality
