

## No buzzes, no dropouts, no distortion – just pure crisp sound

SoundCast uses frequency hopping spread spectrum (FHSS) technology in which the transmitter constantly and automatically searches for open channels in the 2.4GHz band and jumps to them to avoid interference with other products, such as cordless phones, radio controlled devices, mobiles, microwave ovens, remotes and wireless routers.

## The Ultimate Outdoor Wireless Speakers

A powerful broadcast range of up to 100 metres allows you to enjoy rich multi-directional premier sound in your house, around the BBQ and on your boat. The OutCast plays via one of the two SoundCast transmitters, and can be connected to an MRA system

- Can run two speakers off one transmitter
- Made of water resistant, UV coated plastic
- Great for apartment living
- Can link in with Forte A-BUS systems and remote controllable via iPhone or iTunes
