Designed For The Consumer
Built For The Trade

Submerge

Did You Know A-BUS...

Is the only MRA system providing amplification on an IR speaker - both in ceiling and external wall mount

Each pair of active speakers come with a learning remote keypad, on wall cradle & is magnetised so can stick to a fridge

Can provide up to 8 central sources

Offers local source inputs in a wallplate or iPod wall dock

Provides IR commands to control an iPod remotely while in its wall dock

Works wirelessly to a room with SoundCast's SubCast

Is Plug n Play, without programming which means no call backs.

4-room system draws less electricity than one standard light bulb

And you thought A-BUS only sounded good. In an economy where every dollar counts, A-BUS is the answer

Your Home in Sound

A-BUS provides an extensive range of Plug n Play Kits which are scalable, and without any limit to the number of rooms
