

iSolutions

Multi Room Audio with iPod

Free up your iPod music to play in every room of your home.

iSolutions from Forté A-BUS is a range of flexible multi-room kit systems with the facility to dock multiple iPods or iPhones, and listen from any room in the house.

As with all Forté A-BUS music systems the options are flexible enough to suit any home. Choose from systems as simple as one iPod music source for two rooms - to the ultimate, a system of four iPod sources for up to 20 rooms.

Various control module and speaker options are available including the award-winning A-BUS/DIRECT IN-CEILING speakers and the weather-resistant A-BUS/DIRECT WALL speakers both with a cradle-mounted learning remote keypad.

With iSolutions you can choose to position speakers outdoors, and control even in direct sunlight. The magnetised learning remote keypad can be attached to the fridge, taken out by the pool, or kept in its cradle on the wall. Forté A-BUS systems offer flexibility and freedom to enjoy your music.
